## EDUCATION

### SOU "Car Samoil" - Resen

2015 - 2019

Successfully completed 4 years of reformed high school.

### FIKT

2019 - 2023

Successfully completed 4 college years in the program for Computer Science and Communication Engineering.

## EXPERIENCES

### Internship Experience

Completed three months of internship for SnapLogic – an Integration Platform. During the internship, I've learned how to integrate components in order to make a one functional system using snaps.

### Team Work

Worked in a team in order to create the backend of E-commerce using .NET C#, MS SQL and Git. In period of 3 months, my team and I created functional APIs for the e-commerce, divided in three controllers. For updating our work, we were using Git. For accessing and manipulating with the data from the database, we were using Entity Framework. My knowledge developed more after working on this project with the team. We were presenting our project in our college.

## PROJECTS & SKILLS
