## EXPERIENCE

2019 Present

### Technical Lead

#### DIGICUBE / Switzerland & Macedonia

**METANAND:** Developed with React Native, PHP, MySQL  
The application includes companies in Liechtenstein and the user is able to view the profile of the company and give rating for that company, METANAND also includes quiz, based on the points obtained by the user they will be granted with discount the application also reminds them of quiz deadlines, each customer can play the quiz once a week.

**AXPO:** Developed with React, Node.js, MongoDB  
AXPO has many restricted rooms, but in meantime it has many groups that are visiting AXPO if you would like to enter in one of these rooms you should take a quiz and based on obtained points the admin will decide for your visiting.

**INTIRE:** Developed with React, Node.js, MySQL  
INTIRE manages the whole process in DAVOS where the World Economic Forum (WEF) is held. For each VIP guest INTIRE organizes hotel, food and person responsible for that client, this project uses two factor authentication in order to make it more secure due to the sensitive data.

**VIBES:** Developed with React Native, NodeJS, MySQL  
VIBES is POS (point of sale) application for a client who manages three restaurants, this application offers full customization of the products, significance of this POS application is that while ordering it offers you to make the product customized, meaning you can add ingredients that you want and after ordering, it will send a hard copy to the kitchen as well to the bar.

2018-2019
