

Robertino Dimoski

Mobile Developer

Hello, everyone!

I'm Robertino Dimoski, and I'm thrilled to share a bit about myself as a Mobile Developer.

My passion lies in crafting innovative and user-friendly applications that bring ideas to life.

With extensive expertise in various programming languages and cutting-edge technologies, I've successfully delivered numerous mobile apps across different platforms.

I pride myself on attention to detail, problem-solving skills, and staying up-to-date with the latest industry trends.

It's an honor to be part of this exciting field, and I'm eager to contribute my skills to create amazing mobile experiences. Thank you!

Experience

Oct 2021 – Ongoing
Polar Cape

Mobile Developer

I create and design the mobile application for the client.

The project was connected to a mobile health care application designed in Figma and developed in React-Native. We used the best and newest technologies and techniques, we had real time data streams, we had notifications, and also we deployed it to Google Play store and App Store.

Technologies and Methods: *iOS, React Native, UI/UX, Android, Agile Methods, SOLID Principles, React*

Dec 2020 - Jul 2021
InfoBiro

Android Developer

I was an Android developer for an internal project.

Based on e-commerce and warehouse management, we developed an Android application which was possible to use even without an internet connection. It was developed in Kotlin (the 2.0 version) and the original one was made in Java.

Technologies and Methods: *Java, Kotlin, Figma, Agile Methods, Scrum, Notifications, SQLite*

Feb 2020 - Mar 2020
EchoIOS

Android Developer

An Android development internship.

I created an application for Contacting companies via phone, email, and Location.

Also, I had the responsibility to create a digital Menu, for small POC, including firebase and local database SQLite.

The name of the application is VG Contact.

Technologies and Methods: *Java, Postman, SQLite, Figma*

Oct 2019 - Dec 2019
Freelance

Android Developer

It's an Android dating app. The application is on Google Play Store. The name of the application is Lonely Hearts.

Developed with Kotlin connected to firebase and it had all the firebase available features, Notifications, Authentication, Database and many others.

Technologies and Methods: *Kotlin, UX Zeppelin, Firebase*

Mar 2019 - May 2019
NextHop

Mobile Developer

I was a mobile developer for creating applications for Android and iOS.

We created the application in Flutter.

The application was made for the health care industry. The app was designed in Figma, developed in Flutter. We made it in collaboration with a back end team. The app had Notifications and SOS calling.

Technologies: *Databases, C#, Postman, Flutter, UI Design (Figma)*

Technical skills

LEVEL 4 - ADVANCED

Flutter, Kotlin, Postman, React, React Native

LEVEL 3 - HIGH COMPETENCE

Agile Methods, Agile methods/Scrum, Android, Databases, Java, SOLID Principles, UI Design (Figma), UI/UX

LEVEL 2 - INTERMEDIATE

C#, iOS, SwiftUI, UX Zeppelin, Web applications

LEVEL 1 - NOVICE

Front-end

Other skills

Good communication skills

Ability to adapt

Presentation skills

Team Player

Ability to resolve conflicts easily
