SHORTLY ABOUT ME

Hello, my name is Stefan. I am a **full stack web developer**, project coordinator and manager. First of all I have a big interest in **web development & web security**. I like to meet new teams, new people and their culture. I like challenges to motivate other team members, I am efficient in my work and respect deadlines. I find problems and solutions very efficiently, which is probably a side effect of *studying natural sciences, mathematics and computer sciences* :) . I have always been interested in learning both in working in a team environment and as an independent worker. **New challenges, new knowledge and acquaintances are what motivate me.** I started programming relatively young, when i was 15 years old. I won an IT/Programming competition locally in my city, where I had 100/100 points. The tasks were mostly logical and were done in Python. I still have a lot to say about myself, like for example that I like fitness and a healthy life. I prefer to talk about myself live, not on a white paper. **I am open and available for conversation 24/7. Feel free to contact me.**

WORK EXPERIENCE

> IV-Solution

FULL STACK WEB DEVELOPER

at **IV-Solution**.

<https://www.iv-solution.net>

September 2019 to June 2021

(1 year and 9 months)

FULL STACK WEB DEVELOPER

at **Bluepoles**.

<https://www.bluepoles.at>

September 2022 to November 2022

(3 months)

- Primary back-end development using **C# (ASP.NET Core 6.0)**.
- Front-end development using **HTML5, CSS & Bootstrap**.
- Content management using **Umbraco**.
- Created Authentication and Authorization using Identity Scheme. (transferred whole **Entity Framework** to **LINQ2DB**).
- **Fixed & updated** current company's project's template (back-end work mostly with Layers, Core, Libraries, NuGet Packages...).

Found and fixed a bug with

LINQ2DB Command Line Interface

(CLI), while using customized

interpreter:

Scaffolding Issue with .NET6.0 and

Customized Interceptor · Issue

#3820 · linq2db/linq2db

(github.com)
