EXPERIENCE

November 2021– present

Frontend developer, Pabau

February 2021 – November 2021

Frontend Developer, Sigmoid Group

10 March 2010 – February 2021

PROJECT 1

Title: PABAU CLINIC SOFTWARE

Client: [Pabau](#)

Role: Frontend developer

Technical Environment:

NextJs, Typescript, GraphQL.

Description:

This project is constructed for the needs of the medical clinics all around the world.

Through the designed software, the clients can make an appointments that are updating and appearing in real-time, can make online bookings, transactions and generate reports with sales information and stats.

Responsibilities:

- Taking instructions from the Team Lead
- Feature implementation and bug fixing
- Optimizing for different browsers and devices
- UI implementation by the given design
- Estimating work time on the app.

PROJECT 2

Title: Jetminds

Client: [Sigmoid Group](#)

Role: Frontend developer

Technical Environment:

Javascript, JQuery, Sass.

Description:

This project is the first Macedonian internet platform where the students from primary and secondary schools can learn online. The project offers video lessons that illustrate school problems in an illustrative way and a huge number of tasks, available for each topic and displayed across multiple levels, with the ultimate goal of ensuring the improvement of current material before learning new materials. Also, the platform offers detailed analytics for parents, where it can be accurately and transparently tracked how

much the student has studied regularly, how much of the material they know and how it is compared in various parameters with other children of his / her age.

Responsibilities:

- Optimizing for different browsers and devices
- Optimizing the user experience
- Developing and maintaining the user interface
- Fixing bugs and testing for usability.
