Senior Software Developer / Technical Consultant / Lecturer

Summary

He is an ambitious enthusiast in the professional field, beside the studies he have attended many other summer schools, courses, lectures and debates in the country and abroad.

He is an experienced Senior Software Developer with a passion for developing innovative programs that expedite the efficiency and effectiveness of organizational success. He is well-versed in technology and writing code to create systems that are reliable and user-friendly. Supportive and enthusiastic team player dedicated to streamlining process and efficiently resolving project issues. He tends to respond to the challenges with great responsibility, determination and creativity. He is always open to familiarize and work with new technologies. His main focus is on JavaScript (both of the serve as well as the client site) with the latest standards by ECMAScript and using modern principles. He have experience both of working in practice as well as teaching experience in working with students at Code Academy as mentor of the Backend Development.

His main responsibility is to make sure that the entire software development life cycle is being properly implemented according to requirements.

He is one dedicated, organized and creative person, willing to work in teams and share ideas.

Highlights

- 5+ years in software development industry
- Excellent knowledge of REST & Web API, JSON and XML
- Advanced knowledge of JavaScript
- A good understanding of the SDLC
- A good understanding of the Agile methodology
- Ability to lead contractors and junior staff when called upon
- Ability to take the technical leadership on project to ensure all coding & development standards are met
- Ability to perform multiple tasks in a fast paced, team environment
- Expertise with database management and development
- Experience in using a variety of IT management tools such as Git, TFS, BitBucket and GitLab

Experience

Senior Software Developer – Contract

Heart for Health ITC

April 2020 to August 2020

Working as an external developer (contractor) and contributing on the MedicalPortal 2.0 project
Code review, leading intern team with 4 developers

Technologies: JavaScript, Vue, Vuex, Vuetify, SCSS, HTML

Senior Software Developer – Freelance

Upwork

January 2020 to Present

Technologies: JavaScript ecosystem: Node and React

Lead JavaScript Developer – Freelance

FintecApps – Stochlom, Sweden

December 2019 to Present

<http://fintec.sg/>

Technologies: React and Node

Senior Software Developer – Full-time

Seavus– Skopje

December 2018 to February 2020

<https://seavus.com/>

<https://www.btobet.com/en/>

BtoBet Division (Gambling and Gaming) – Online casino games and betting system

Achievements

- Worked as a Front-End Developer
- Assisted the team lead in establishing the project plan, by evaluating the estimations
- Improved and added new features for the internal product.
- Worked in scrum process attending daily stand up and completing tasks in sprints.

Technologies and Tools: JavaScript, Vue, Vuex, ES6/ES7, AWS, Visual Studio Code

Lecturer – Part-time

Code Academy Macedonia– Skopje

January 2019 to August 2019

<https://codeacademy.mk/home/>

<https://github.com/dpeshevski/project-a>

<https://github.com/dpeshevski/project-c>

Achievements:

- Teaching and mentoring students about Backend Development (Node, MySQL, AWS)
- I was a Lecturer in Backend Development. It is an intensive program in programming by 3 times in a week. Where I have around 200 hours of instruction and over 100 hours of online support. I have lots of experience helping students from many different age groups and many different levels of experience.

Technical Lead Consultant/Senior Software Developer – Part-time

Pixyle – Stip

June 2018 to December 2018

<https://www.pixyle.ai/>

Working as a Team Lead on AI product for fashion retail, code review

Achievements:

- Maintaining a productive working environment for development teams.
- Lead the architecture and development
- Proposed solutions and led the applications of continuous integration server for automated testing and deployment
- Mentored, proposed and share Agile practices (scrum, TDD and pair programming)
- Assisted the project manager in establishing the project plan, by evaluating the workload and estimations
- Representing the technology perspective on a management/board level.
- Establishes and co-ordinates programmers of work (delivered through development).
- Lead a team of 6 full-time engineer, establish engineering best practices and be a mentor to other members of the team.
- Developed and tested each module according to the functional specifications and technical design
- Documented technical and functional specifications
- Responsible for overall IT headcount.
- Code review on Jr Developers.
- Improved and added new features for the internal product.
- Worked in scrum process attending daily stand up and completing tasks in sprints.

Technologies and Tools: JavaScript, Node, React, ES6/ES7, Python, Scrappy, PostgreSQL, Sequelize, AWS, Jenkins, Docker, Visual Studio Code

Full Stack JavaScript Software Developer – Full-time

Tricycle Ltd. – Skopje

May 2018 to November 2018

<https://tricycletd.com/>

Achievements

- Develop features using various technologies most notably JavaScript.
- Performed deployment triggered automatically by every commit (Jenkins) to our Staging environment
- Driven by Agile methodologies and best practices: TDD, Continuous Integrations, pair programming and code reviews

Technologies and Tools: JavaScript, Node, MySQL, Sequelize, Vue, React, AWS, Apache, Jenkins, Web Services, Sockets

Software Developer (Contract) – Part-time
Adeva – Skopje

February 2018 to September 2018

<https://adevait.com/>

Working on the online booking system for New York industry

Achievements/Language:

- Part time JavaScript Developer using JavaScript, Node, React, Redux, ES6/ES7 features.

Software Developer

Sourcico - Skopje

October 2017 to May 2018

<https://sourcico.com/>

Achievements:

- Worked on a project based on deep low-level MTIM proxy to intercepting network, capture connecting to injecting HTML, blocked sites, redirecting, etc.
- Designed and developed so many new projects on existing systems for existing customers
- Added many new features to existing modules
- Attended all technical meetings and workshops
- Full stack JavaScript Developer with latest technologies and standards.

Technologies and Tools: JavaScript, Node, Angular, MySQL, Sequelize, PostgreSQL, SQLite, MTIM proxy, Windows Installer, Jenkins, AWS

Software Developer (Contract) – Part-time

Dolare - South Bend, IN

April 2017 to January 2018

<https://dolare.com/>

Achievements/Language:

- Part time work, using a variety of mainstream and open source technologies of MEAN Stack.

Software Developer – Full-time

ITCrowd - a technology company - Skopje

April 2017 to October 2017

<http://itcrowd.me/>

Working on Lora Wan product

Achievements:

- Working on the projects of IoT (The Internet of Things) using latest technologies of Node.js and modern JavaScript.

Technologies and Tools: Cassandra, Redis, Node.js, MySQL, AngularJS, JavaScript, Express.js, AWS, Visual Studio Code

Software Engineer – Full-time

Abix – Skopje

Aug 2016 to April 2017

<http://abix.mk/>

Achievements:

- Working on projects and have hands on experience with Node.js using Koa and JavaScript with modern principles and libraries, Babel, no relational database RethinkDB, deployment using Docker, Axios http/s requests, FluentD.
- Fully automated deployments using CI/CD and Ansible on Jenkins
- Confident handling in Scrum and Kanban such as part of the Agile movement

Freelance Jr Web Developer – Freelance

Freelance/Self employed

2012 to 2016

Achievements:

- Providing support in development of ASP.NET responsive web applications using MVC Framework
- Using ADD.NET Entity Data Model for database connectivity, also LINQ to entity for querying a database
- Providing support in designing web applications using CSS and HTML5
- Develop different modules in windows forms using .NET Framework
- DML operations for fetching records, delete duplication of data, alert existing records
- Create complete database structure for different modules and design ERD's
- Create stored procedures to perform different DML operations
- Creating Organizational Units and Active Directory Services

Language/Tools: Microsoft .NET Stack, C#, T-SQL, JavaScript, jQuery, AJAX

Portfolio

Phishing as a Service (PHAAS)

Fully integrated platform, a large scale phishing: measure the risk of phishing among the employees as well as the effectiveness of awareness campaigns and trends over time; help in the process of rising awareness against phishing; evaluate the basic protection controls implemented by the organization.

Device as a Service (DAAS-UI)

The project is a fully compliant to LoraWan™ 1.0.2 with support for all features of the specification and all devices classes, A, B and C. Can be completely managed via a web-based user interface. Control and status of all aspects of the development.

Titan

Solution for transaction monitoring AML software. Titan can identify and prevent potential financial crimes, as well as ensure that payments are processed thoroughly, efficiently and timely manner. It helps facilitate safe and secure transactions and mitigate regulatory pressures of international banking

MITM Proxy

Deep low-level MITM proxy to intercepting network traffic, captured connecting to injecting HTML, blocked sites, redirecting, as well etc. Windows Service.

Sports of the day

Site for live soccer scores from across the world. Get livescores, cup results, fixtures, league table, statistics and more.

Pixyle

A deep learning network to recognize fashion items in images.

Hotel night life

Booking system for exploring places in New York, USA.

BtoBet Sportsbook

The Sports betting RE is available for online and mobile betting, can control and suggest bets or events, including virtual, live and eSports. It acquires and analyses the player's behavior following Sport, Category, Tournament, Competitors, and Market Types preferences. Moreover, BtoBet's RE is regularly re-trained in an extremely short time frame, with any new data and player's behaviour, fully updating the system and every single player's profile precisely. BtoBet's recommendation engine helps to increase their engagement and make them feeling special.

Skills

Programming Language & Technologies

- ◆ Node, Express, Koa, JavaScript, Babel, Webpack, React, Vue, Vuex, Vue-router, ES6/ES7;
- ◆ Python
- ◆ JSON, JSON WEB Token (JWT), OAuth2, Redis,
- ◆ C#, ASP.NET (MVC & Web Forms), Web API;
- ◆ HTML5, CSS3, SASS(SCSS), AJAX, jQuery, Bootstrap, Vuetify
- ◆ AWS (Amazon Web Services)

Database: T-SQL, SQL Server, Rethink, PostgreSQL, Sequelize.js, MySQL, SQLite

Tools: Git, Bit Bucket, JIRA, GitLab, Assana

OS: Linux, Windows, Mac

Education

Computer Science and Software Engineer

2010-2014

University Goce Delcev

Shtip, Macedonia

Computer science & software engineering

GPA: 8.92/10.00

Languages

Macedonian

Native proficiency
