Djina Stevkovska

There are two kinds of people: those who do one thing and make a big deal out of it, and those who do 10 tasks and at the end of the day still wonder if they've done enough. I'm definitely in the second group, always aiming to make a difference in everything I do. It's this mindset that fuels my passion, keeps me engaged and innovative in my work.

WORK EXPERIENCE

Backend Developer - **Boozt | Sweden**
Fullstack Web Developer

2022 - present
2021 - 2022

Finance **Reports** **Accounting** **Integration**

Building complex financial concepts and handling large data to optimise workflow in our internal finance system. In my role, I am focused on making things run efficiently, handling complex calculations for reports, and integration between multiple systems. Collaborative teamwork, system adaptability, and a commitment to continuous learning in this huge sector are my key skills to being successful in this fast-paced environment.

Software Engineer - **The Code Connectors | Netherlands**

2020 - 2021

Sport **Health** **Real Estate** **Analytics**

I maintained multiple projects and gained dynamic experience. Doing various tasks and collaborating with multiple clients, contributed to my multitasking and teamwork skills. I was entrusted with leading a project, which I introduced to the company. This marked a quite big step in my career, as it required new responsibilities like decision making and team coordinating. Working with external API's and parsing, analysing and reformatting data.

Software Engineer - **Tokiwi SA | Switzerland**

2020 - 2020

Booking **Services** **Payments**

Worked on software solutions for a hotel including booking and reservations of rooms, restaurant tables, ski equipment, and transportation. Developed user-friendly interfaces, managed databases, prepared data visualisation, integrated services, and implemented secure payments. Enhanced customer experiences and provided technical support. I got the opportunity to work on this project during my studies when I was selected as the top-performing student, alongside one of my colleagues.

Fullstack Web Developer - **Sharkdigital | Switzerland**

2019 - 2020

Automotive **Health** **Beauty** **Real Estate** **Pharmacy**

Developing dynamic and visually appealing websites using platforms WordPress, Magento and Joomla. Extensive experience in customizing themes, plugins, and modules to meet specific project requirements. Proficient in utilising the flexibility of these content management systems to deliver user-friendly and scalable web solutions. These experiences allowed me to gain valuable skills and insights into web development, extend my knowledge, and gradually transition into more complex development tasks.

Co-Owner - **MotorOil | N. Macedonia**

s. 2016

Automotive **Services** **Retail**

Working with my father and running a car service and car parts store involves providing automotive services, managing inventory, and offering a range of car parts and cars for retail. It requires a keen understanding of the automotive industry, strong customer service skills, and effective inventory and car park management. Balancing quality products, high service quality, competitive pricing, and skilled staff contributes to a successful business in this sector.
