### PROFILE

---

I am organized, highly motivated, punctual, and I pride myself on being adaptable in the workplace. Discovered a passion for developing, so I made a switch in my career from transports and logistics to programming.

I completed a Full Stack Web Developer course at the Seavus academy, attended a part time at WIDNET so I can get familiarized working in agile environments. I am also further developing my skills though freelance as a web developer. This days I'm learning React and grow fast as a React developer.

This enabled me to stretch my skills and discover exactly what I was searching for, so now I feel ready, and I am looking for a challenging environment where I will be able to utilize my skills, strive and grow professionally.
