## DESCRIPTION

I would like to express my sincere satisfaction if given the opportunity to attend an internship or full time job in your company. I am deeply convinced that I could gather relevant programming knowledge that could then be applied to our further collaboration. I am currently studying at the Faculty of Electrical Engineering in Skopje, in the department of Energetic, Automation and Renewable Energy Sources and have attended classes and passed exams which are related to programming. In the past i worked other types of jobs, but my tendency in the future is to focus on programming and to upgrade myself in this direction. I can express for myself that I am a person who is responsible and maximally committed to the task, until the ultimate goal is fulfilled. I am honest, self-initiated and open to cooperation. Hoping to review my application, I cordially greet you.
