

ILIJA JOVCEVSKI

Front-End Software Engineer

Profile

I am a front-end developer who enjoys working closely with other team members. I am skilful in front-end technologies such as Vue.js, React, HTML, CSS and JavaScript, and with a limited understanding of Angular. I am eager to embark on new challenges and expand my skill set further.

Experience

- 2021 - Present** **Emit Knowledge**
Front-End Software Engineer
At Emit, I work in teams of 7-8 people to develop web applications from various domains such as healthcare, social welfare, and finance. My experience includes working for one year in React with Next.js, with a foreign team and one year in Vue.js with Nuxt.js. Our teams follow Agile guidelines and work directly with the client to gather requirements.
- 2021 - 2021** **Emit Knowledge**
Front-End Intern
As an intern I had training to follow the best industry practices and was introduced to Vue.JS, React, and Azure DevOps. After the initial learning period, I was given simple tasks to work on ongoing projects.
- 2021 - 2021** **Web Factory**
Front-End Intern
Web Factory was my first experience in the IT industry, where I worked with a mentor to learn best practices in software development. During my internship, I gained knowledge in HTML, CSS, JavaScript, Typescript, GitHub, Angular and Bootstrap.
- 2008 - 2020** **Makedonijaturist AD**
Data analyst
Prior to transitioning to software development, I spent over a decade as a Fulltime Data Analyst at Makedonijaturist AD, where I honed my analytical skills and gained extensive experience in data interpretation and reporting.
