About me

My name is Emilija. I have graduated from college in 2012, as a designer. My focus is creating something beautiful and at the same time useful, and easy to use for everyone. I have a great eye for aesthetics, I love color and design. The main focus is on creating great usable design. That is why I decided to take the next step as a UX/UI designer. I hope you will give me a chance to work with you.
