Education

Bachelor of Computer Science and Engineering

03/2023

Faculty of Computer Science & Engineering (FINKI), Skopje

Graduated on a thesis: "Comparison of the innovation, business model and ICT appliance between Spotify and Deezer" where I've applied a comparative analysis between the two popular music streaming platforms by reviewing their business models as well as the benefits they offer to the casual users and artists by using their platforms. Here I mentioned the audio quality, user experience and the revenue an artist generates per 1.000 streams to help people decide which platform is better for them. Later I've applied SWOT analysis in order to review their directions for the future growth as a businesses and to get a better picture of the reason why they are in the leading position for years.

Employment

Full Stack Developer

07/2018 - 11/2018

Innosmart (later Nova Code), Skopje

Here I've learned building web apps using .NET MVC with MySQL database which expanded my knowledge for the Back-end part of the apps. For the Front-end part I've used mostly HTML5, CSS3, pure Javascript and sometimes Wordpress with Elementor plug-in.

Websites I've build here: bff.mk, ginekaliks.mk, makalarm.mk and innosmart.mk

Front end developer

03/2020 - 08/2020

Freelance, Skopje

Built a website for e-commerce type of business called bokimginzenering.mk which is a company that mainly sells products for office use.

The website is built using HTML5, SCSS, Javascript and Tailwind. Here I've also learned to host a website using Plesk and understand the importance of a good Search Engine Optimization.

Full Stack Developer

09/2022 - Present

Upwork, Skopje

I've started freelancing by building websites mainly for e-commerce use and found out how important React and its reuseable components come into play when building a powerful website.

Im highly enthusiastic when it comes to learning new technologies and expanding my knowledge as a developer, recently I've started taking a course in NodeJS on Udemy.

Courses

React - The Complete Guide 2023 (incl. React Router & Redux)

Present

Academind by Maximilian Schwarzmüller

Complete NodeJS Developer in 2023 (GraphQL, MongoDB, + more)

Present

Created by Andrei Neagoie, Adam Odziemkowski
