HIGH SCHOOL SUGS Rade Jovcevski - Korcagin

Address 1000, Skopje, North Macedonia

● DIGITAL SKILLS

OOP | HTML | CSS | SQL | MySQL | PostgreSQL | Java | JavaScript | JQuery | C | C++ | PHP | Symfony | Composer | DoctrineORM | C# | ASP.Net | Angular Js | MATLAB | Wolfram Mathematica | JSON | Swift | XCode | Linux | Unix Shell (SSH) | Android (Android Studio) | Firebase | Python | Git | Github | Jira | Bitbucket | AWS

● PROJECTS

Symfony Form Example

A simple form submission app, made with PHP's framework Symfony. The user submits the form and the submission is listed on form/results page and saved into a database. The form/results page has a pagination implemented from the form.html.twig file with a limit of 10 records per page. Used Bootstrap for the form fields validation.

Link <https://github.com/nastevskat/simpleFormApp>

MoviesApp

Fetching movies array populated with movie title, year, genre(s), description and image. Adding manually a new movie saved to local storage with the same properties as the ones from the array, alerting the user that the movie is added and merging it with the already existing movie array. Added a filter by genre and a popover on click on movie. Used Bootstrap 5 and jQuery.

Link <https://github.com/nastevskat/MoviesApp>

eShop

Book Shop Website, based on PHP MVC structure.

Link <https://github.com/nastevskat/eShop>

DeliveryApp

Food Delivery App done with Swift and Firebase Database

Link <https://github.com/nastevskat/DeliveryApp>

TV Show App

App made with Swift for listing and reviewing TV Shows.

Link <https://github.com/nastevskat/ios-project>

Courses App

Courses App made with .NET MVC Architecture. Each professor can see his courses and the students enrolled.

Link <https://github.com/nastevskat/Courses-App>

Angular App

An Angular Web Application representing the tourism in my country.
