Education

High school

ETS Mihajlo Pupin, Novi Sad

Sep 2003 - Jun 2007

Faculty

Ekonomski fakultet Subotica, Subotica

Sep 2007 - Oct 2012

Employment

Lead Android developer

Faktor/Liveramp, Amsterdam

Development of android SDK for consent management. Work on GDPR legislation-based solution with idea to protect publisher (application) user's data. Using IAB specification for creating user interface which should appear on app start-up and inform user about what data and how is going to be processed. Also, user is able to give/revoke consent for data processing. Here we had several iterations of the product and also demo application for it. SDK itself is written in Kotlin.

Jun 2018 - Present

Android developer

Mobility Mixx, Amsterdam

Application used for commuting. B2B solution, every business owner has its own set of roles for the users. It is possible to book a taxi, rent a bike, see commuting options from one place to another, expenses tracking and profile customization. Also, we created a service for awarding users which were avoiding city center during the rush hours.

Written in Kotlin, MVI architecture and dependency injection used.

Jun 2018 - Sep 2020

Android developer

Improve Digital SDK, Amsterdam

Development of android SDK for ads. Developed MRAID 3.0 compliant SDK which enables publishers (application developers) to insert ad spaces inside applications. Also we maintained demo application where all features could be tested. App was written in Java and other one in Kotlin. SDK itself is written in Java.

Aug 2017 - Jun 2018

Lead Android developer

Vozzi (Mile CVIK), Beograd

Uber like application for drivers and car repairers. App purpose is to connect car drivers which have mechanical malfunction with companies which offer car repair services. There are two sorts of apps, one for the drivers and one for the companies which work on car repair. When driver calls for help, three closest repairers gets notified and have option to respond. After that driver gets offer and he has option to accept offer or not. If he does, he gets info for how long he needs to wait for repair service.

Android developer

Dec 2016 – Mar 2017

Noteworthy, New York

“Take charge of your health. Noteworthy allows you to send health updates directly doctor. Using the at-home clinical devices that we send to you (based on your doctor’s prescription), you are able to provide you doctor with a clearer picture of your health. And the more your doctor knows about your day-to-day health, the better they can care for you.

Android developer

Sep 2016 – Dec 2016

vHike, Novi Sad

“Safe Hiking App takes care of hikers’ safety while they are out in nature and awards them for the effort they made on the track like climbing the summit, reaching a remote waterfall or another interesting location. Find perfect HIKING TRAILS with ease, vHike enables you to find easily perfect hiking trails that will allow you to make the most out of a national park or a region where you are. There are no tracks that are sufficient and lead nowhere. Everything is sorted to be easy to find and explore. In this way, a hiker can plan his hike in a matter of minutes instead of hours.” from Play Store
