2019-

SOU Josip Broz Tito-
Bitola 2015-2019

WORK EXPERIENCE

Taskforce BPO (Call Center Agent)
-November 2021 - October 2022

SKILLS

- HTML + CSS
- Bootstrap
- Git
- Java Script
- Type Script
- React and NextJS
- Microsoft Office Package

Have done 2 projects and one doing currently:

1. First project:

-Only HTML & CSS (Bootstrap) and a little bit of JS used for filtering cards. The website consisted of two pages: The first one was the main page (landing page) which 3 filters to filter out the cards shown.

The second page was a mock form in which you could insert data into inputs, but the data didn't go anywhere.

2. Second project:

- HTML, CSS (Bootstrap) and JS.

This website was a single page application in which you could choose to be a guest or artist from a dropdown menu. Depending on the choice it would refer you to a different website. The application's goal was to help artists sell and show their artwork through auctions. They could also upload their artworks through their camera.

3. Third Project (Velnes):

- Writing the application in React, the application is for Macedonian Beauty salons all over Macedonia. The company for which we are doing this project is called Velnes. It is an app that will be used for scheduling appointments, finding locations etc.

We had the choice of using NextJS or React, but I went with React since it's a more dynamic driven application.
