

Daniel Kolevski

Software Engineer

Profile

Impressed by technology and looking for a job that suits the IT profession and its flexibility that it offers. Motivated to work and with huge will to learn. Beginner in this field but with a wide range of basic knowledge of several languages. Good listener responsible for what is requested.

Education

Bachelor degree, Faculty of information and communication technologies, Bitola

October 2016 — December 2021

Academy year, Seavus Education and Development Center, Bitola

November 2021 — December 2022

After a good and exciting year at the Academy. We worked on a lot of projects that helped us with acquiring basic skills in the field of programming, but mostly focused on back-end programming. Studying was online and went exactly as I expected, satisfied. Now I am looking for an internship that will help me in my further development as a back-end developer.
