About me: Aside from 2+ years of spent in graphic and web design, my 2 years of experience in Front-end technologies have seen detailed and not-so-detailed planning, implementation, organization and maintenance of semantic HTML structure, stylesheets and modular mini JS plugins. Solid grasp of React.js and Redux. Good communication and soft skills and always interested to learn and keep up with the current state of technologies.

## ● WORK EXPERIENCE

---

06/05/2019 – CURRENT  
**FRONTEND DEVELOPER** – VOX TENEO

---

Working in small and medium sized teams on a variety of projects which are developed in Laravel and .NET Core. Daily activities range from simple CSS bugs and updating old codebase to setting up front-end side of a new project dealing with HTML/CSS/JS, jQuery and ReactJS. Project managers work remote so we communicate on a daily basis online accompanied with regular technical meetings on a weekly basis.

*Technologies:* HTML/CSS/Javascript; ReactJS;

01/10/2017 – 01/02/2018  
**WEB DESIGNER** – MAISON DEQUARTIER - FEWGOODGEEKS OY

---

Small team working on WordPress based site with a custom theme intended as a refurbish and continuation of an old language teaching website. Designed wireframes, mockups and various graphical assets, worked together with client on UX considerations for all new sections and features.

*Technologies:* Adobe Illustrator; Adobe Photoshop;

01/10/2017 – 01/02/2018  
**WEB DESIGNER** – DERUCHEBOURG - PLANON

---

Designed an MVP version of a customer service portal taking into consideration different devices it would be used on and that would be adhering to the company's existing website design. Afterwards, develop the design into a web solution that would be fully responsive.

*Technologies:* Adobe Illustrator; Adobe Photoshop; HTML/CSS/Javascript;
