

Robertino Dimoski

Mobile Developer

Hello, everyone!

I'm Robertino Dimoski, and I'm thrilled to share a bit about myself as a Mobile Developer.

My passion lies in crafting innovative and user-friendly applications that bring ideas to life.

With extensive expertise in various programming languages and cutting-edge technologies, I've successfully delivered numerous mobile apps across different platforms.

I pride myself on attention to detail, problem-solving skills, and staying up-to-date with the latest industry trends.

It's an honor to be part of this exciting field, and I'm eager to contribute my skills to create amazing mobile experiences. Thank you!

Experience

Nov 2021 – Apr 2024
Skopje

Mobile Developer

PolarCape

I create and design the mobile application for the client.

The project was connected to a mobile health care application designed in Figma and developed in React-Native. It had the best and newest technologies and techniques, we had real-time data streams, we had notifications, also we deployed it to Google Play Store and App Store.

Techonologies and Methods: iOS, React Native, UI/UX, Android Developer, Agile Methods, SOLID Principles, React

Dec 2020 - Jul 2021
Ohrid

Android Developer

InfoBiro

I was an Android developer for an internal project.

Based on e-commerce and warehouse management, we developed an Android application which was possible to use even without an internet connection. It was developed in Kotlin (the 2.0 version) and the original one was made in Java.

Techonologies and Methods: Java, Kotlin, Figma, Agile Methods, Scrum, Notifications, SQLite

It does not have a link at Google play because it's internal.

Struga

Android Developer

Freelance

It's an android application for finding love. The application is on Google Play Store. The name of the application is Lonely Hearts

Developed with Kotlin connected to firebase and it had all the firebase available features, Notifications, Authentication, Database and many other.

Tehnologies and Methods: *Kotlin, UX Zeppelin, Firebase*

Mar 2019 - May 2019

Mobile Developer

NextHop

I was a mobile developer for creating applications for Android and IOS.

We created the application in flutter and it's relatively new.

The application was made for health care but it never made it to the stores due to an investor pulling out, The app was designed in Figma developed in Flutter we made it in conduction with a back end team. The app had Notifications and SOS calling.

Databases, C#, Postman, Flutter, UI Design (Figma)
