

# NIKOLA TRIFUNOVIC

---

Serbia | webpioneer23@gmail.com | `live:cid.1f0482219d42ee4d`

## OBJECTIVE

---

As an 8-years developer, I worked as a web developer at a startup and as a web manager.

I was mainly in charge of web service development and, if necessary, also played the role of Website administrator.

I like to contribute to business growth and is particularly focused on e-commerce, casino, betting and corporate management topics.

Also, for big projects, I have actively communicated and collaborated with team members in various positions.

I try to keep repetitive logic modular and standard code style.

Based on understanding business logic, we have experience in designing and building our own flows and improving inefficient processes.
