Summary

- I'm Daniel, a Front-end developer with one year of experience working as a freelancer on various personal and client projects.
- I graduated from the Academy for Front-end development and web design at Qinshift Academy (former SEAVUS Education and Development Center). During my time at the academy, I honed my skills in creating responsive and user-friendly websites and applications, mastering an array of technologies. This transformational experience has not only broadened my technical expertise but also enhanced my organizational, problem-solving, and collaboration skills.
- After 10+ years as a paralegal, transitioning to IT has been challenging. However, I'm determined to succeed in this new career of coding and problem-solving.
- One of my significant achievements was leading a dynamic team of five as the lead developer on a project for a real client (https://mladi.ckrm.org.mk). It showcases my commitment to excellence and delivering innovative solutions.
- My diverse skill set and unwavering dedication makes me a unique asset, ready to drive success in the world of coding and web development.
