Software Developer   Jun 2018 - Oct 2019
Power Soft
Power Soft, Skopje

Project: Extempore Extempore allows instructors to obtain and assess authentic speech without having to schedule face to-face time with each student. Instructors can now create an activity on the Extempore website, selecting a set of parameters for each question, depending on the learning objectives. When configuring a final exam or any other form of summative assessment, for example, the teacher may limit the time the student has between reviewing the prompt and answering the question The Extempore app also allows the instructor to decide whether students can re-record their answers. For practice assignments or for any other form of formative assessment, on the other hand, timing restrictions can be more flexible.

Microsoft development technologies for this project: ASP.NET MVC, Entity Framework, CSS, HTML, JavaScript

Software Developer   Nov 2011 - Jul 2014
InterWay
InterWay
