personal brand through an online presence a web blog was built as per her request and my
recommendations.

• Write HTML, CSS
• Upload and run a server
• WordPress

Web Developer / Web Designer
Sorsix
Sep 2020 - Dec 2020 (4 months)
While I was there I worked on two projects one was a government project for breast cancer awareness
and the other one was an educational site for a government subsidized tutors project

The breast cancer awareness(http://skrining.mk/) was relatively easy. I worked together with a
government representative Zaklina to design and develop the site.

While we didn't quite agree on the design choices her requests were very clear and concise and her
response time was world class so my overall enjoyment was high and she was very satisfied with the
end project.

For the educational project I had more freedom to decide on design matters and was supposed to design several icons and graphics apart from the UI/UX tasks which was a nice change of pace. The graphics design(icons) part was especially appreciated and I was commended for the work.

Web Designer
4Ward
Apr 2020 - Aug 2020 (5 months)
• Design Icons and Graphics
• Create UI/UX
• Adobe Photoshop
• Adobe Fireworks
