DETAILS

COURCES

SEMOS Education

DATA SCIENCE INSITUTE
09.2023 – 04.2024

Completed:
- ✓ **DP-080: Querying Data with Microsoft Transact-SQL**

- ✓ **Analyzing Data with Excel and Essential Statistics**
  Project: Customer Analysis
  Aim: Using Power Pivot extension, created data model and DAX measures providing overview of total sales and sales details about different countries through certain periods of time, relative sales, correlation with demographic features, customers and their profit margins, salespeople performance by KPIs metrics.

- ✓ **PL-300: Microsoft Power BI Data Analyst - Microsoft Certified: Power BI Data Analyst Associate**
  Project: HR Analysis
  Aim**:** Analyze and get insights from data set External Interview Data by delivering a simple Power BI dashboard which demonstrates the following visualizations: Most Demanding Partner, Most Productive Employee, Average Number of Touches Required Per Agent or Per Partners, Busiest Day for The Operation (Highest Customer Demand). Tasks completed: connecting to data-sources, creating relationships between tables, create and Format Basic data visualizations, adding visualization /page/report level filters, adding slicers, sorting by other columns, query Editor –adding conditional columns / merging tables / using first rows as headers / changing data types / grouping/ with DAX.

- ✓ **Programming in Python for Data Science**
  Project: Predicting length of stay in hospitals
  Aim: Predict the Length of Stay of patients in hospitals using Linear Regression from dataset Healthcare. Blueprint-Predicting Length of Stay in Hospitals through executing following tasks - load the data, perform Exploratory Data Analysis (EDA) to understand the distribution of the data, identify patterns, trends, and detect outliers, clean missing data (if there are) by either removing the rows with missing data or imputing the missing values, deal with outliers, remove columns which are not significant for the model, preprocess the data by scaling the features, encoding categorical variables, and splitting the data into training and testing sets, train a Linear Regression model on the training set, evaluate the performance of the model on the testing set using R-squared, use the trained model to predict the length of stay of new patients.

- ✓ **No Code Data Science with Azure Machine Learning Designer**

- ✓ **DP-100: Designing and Implementing a Data Science Solution on Azure** (on-going project for classification regression)

PYTHON DEVELOPER
12.2023 –04.2024

Completed:
- ✓ **Scrum Master course - Scrum Master Certified (SMC)**
- ✓ **Python I level - course**
- ✓ **Python II level - course**
- o Real-time project: **User Spending Analysis**: flask application providing APIs to analyze user spending data stored in a SQL database, integrating to MongoDB for storing specific users eligible for getting voucher and sending Telegram messages with calculated statistics to the store management and having unit tests for the APIs endpoints
