Spase Kocev

Macedonia, # +389 77 855 350 # spaseto.kocev@gmail.com

Summary

I am full stack web developer, with experience building projects in both front-end and back-end. I specialize in back-end development with PHP and Laravel. I've always loved problem solving and coming up with creative solution is a strong point of me. I started learning to code when I was a teenager, though it was always more of a hobby, now i am ready to start working in this field professionally.

Skills

- HTML 5
- CSS/SASS
- Bootstrap 5
- Git/GitLab

- PHP
- MySQL
- Laravel 9
- JavaScript

Projects

BrainsterLabs
Simple responsive animated web application that is build using JavaScript. It has a simple card filter and a form validation. First project built in the academy.

CMS-Project
A project that i have built in my spare time. This is a project is a simple CMS that is build in PHP. A user can register and login and has a CRUD for blog posts. There is also an admin panel that can has a CRUD for all posts, and can make a post featured or not. It's also responsive.

BrainsterLibrary
This project resembles an online library management. The project is responsive, build using PHP, JavaScript and Ajax. A user can register/login, add notes to books(CRUD is done using Ajax), add a comment on them and filter books by category. There is also an admin panel where he has a CRUD for books, authors and categories and can approve and unapprove comments.
