EDUCATION AND TRAINING

Formal education "St. Kiril and Metodij" University
Full Stack Development academy "Brainster"

Training Courses:

- **Programing languages:** HTML; CSS; JavaScript(+jQuery, Ajax); PHP(+PHP OOP & PDO);
- **Frameworks:** Laravel; Bootstrap;
- **Data base:** MySql;
- **Git**;
- **Scrum**;
- **Web Hosting**

Other Training Courses:

- NDT level 2 DIN EN ISO 9712 – Magnetic particle testing
- NDT level 2 DIN EN ISO 9712 – Ultrasonic testing
- NDT level 2 DIN EN ISO 9712 – Radiographic testing
- NDT level 2 DIN EN ISO 9712 – Penetrant testing
- NDT level 2 DIN EN ISO 9712 - Visual testing
- NDT level 2 DIN EN ISO 9712 – Eddy Current testing
- NACE Coating Inspector Level 2 - Certified
- BOSSIET

Sashko Atanasovski

WORK EXPERIENCE

2010 - 2020 APAVE SEE – NDT Inspector , QA/QC, QA/QC Data Base, Team Leader on various international project for various clients;

Performing NDT and QA/QC Inspection for various clients like Exxon Mobil, Total, BP, ENI, FMC, Saipem on their offshore and onshore facilities mainly in West Africa

2003-2009 - WELDING INSTITUTE -JUG Skopje NDT Inspector on various projects and clients in Macedonia.

Performing NDT Inspection during regular shutdowns in ELEM power plants and OCTA oil refinery.

Performing NDT Inspection during constriction on TE-TO power plan

PERSONAL SKILLS

Mother tongue(s)   Macedonian

Other language(s)

UNDERSTANDING		SPEAKING		WRITING
Listening	Reading	Spoken interaction	Spoken production	
high	high	high	high	high

English

Communication skills   Good communication skills and interpersonal relations gained through my experience as NDT Inspector and Team Leader.

This is to certify that

SASHKO ATANASOVSKI

Successfully completed the
Full-Stack Web Development Academy

and has sophisticated understanding of all modules of the programme,

a high degree of competence and excellent usage of relevant theory,

methodology, tools and technologies.

Distinction

Petar Ninovski, CEO @Brainster

A Programme offered by Brainster - a learning community.

www.brainster.co

BRAINSTER

- **Brainster's FULL-STACK WEB DEVELOPMENT ACADEMY** consisted
  of the following modules:

HTML	PHP (+ PHP OOP & PDO)
CSS	JAVASCRIPT (+JQUERY, AJAX)
BOOTSTRAP	LARAVEL
GIT	WEB HOSTING
DATABASES	

Distinction

- **SASHKO ATANASOVSKI showed the following results:**

PROJECT 1:	**75** /100	ATTENDANCE:	**97** /100
PROJECT 2:	**120** /100	CHALLENGES:	**84** /100
PROJECT 3:	**100**/100	EXTRA POINTS:	**20** /40

TOTAL: **496/540**

ACHIEVEMENT

achievement

Congrats

Sashko Atanasovski

on becoming a member of the
Brainster innovation community

Project:
Receipt Reading Software

Client:
Jägermeister

Co-innovation partner:
The Locals

FEEDBACK:

Ivica Pesovski

CTO @BRAINSTER & MENTOR OF THE PROJECT

"

In order to accomplish the project on time, the students were presented with a specification curated with the exact amount of requirements that will prove the concept working and will deem the project successful. However, the student went a step further and implemented additional features which were discussed, but weren't mandatory. Having in mind the tight deadlines that were presented and the need to collaborate with other teams in order to accomplish the project, he showed a great dedication, strong programming skills and significant domain knowledge, characteristics that solely speak for themselves and highlight this person's profile!
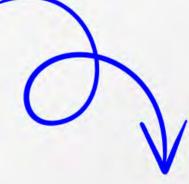

Joco Todorovski

PARTNER @THE LOCALS

The past few months we, as an agency, run specific campaigns for customers with which we want to "bring" online those who buy a certain product offline (from markets and stores) and reward their activity. Part of the mechanism for this is providing online space for attaching a receipt that is showing the purchase of that product. The specific client / brand for which this solution was developed is Jägermeister. Checking and verifying these receipts has been a laborious and expensive process for us so far. We wanted to automate this and shared this need with the students. The solution and the project is in fact a software solution that enables attachment, verification and extraction of information from a receipt. During the project work, the communication and collaboration with the students was smooth and their solutions exceeded our expectations.
