Figma
Jira, Confluence

Traits

Motivated, Inventive
Proactive, Adaptable

Languages

Macedonian (Native)
English (C1)

Hobbies

Cooking
Video Games
Fashion
Literature

Employment History

Android Developer & Team Lead at Inellipse
JULY 2020 - PRESENT

- Responsible for the development, maintenance, and distribution of multiple Android OTT media applications for phone, tablet, tv and auto devices.

- Increased stability and scalability of applications by migrating to MVVM architecture, upgrading frameworks, introducing unit tests and leveraging analytics tooling.

- Utilised Server-Driven UI and feature flagging to create applications with on the fly customisable user interfaces and dynamically activated functionalities.

- Conducted research and developed Android prototype apps in order to verify the feasibility of implementing specific ideas.

- Accelerated the onboarding process of new colleagues by organising knowledge sharing sessions about domain logic and internal tools.

- Spearheaded the initiative to write down documentation that detailed critical workflows, which streamlined the overall development process.

- Closely collaborated with engineers, designers, product managers and clients across the globe to ensure the fulfilment of short term and long term goals.

Quality Assurance Intern at UXMAKE
JUNE 2017 – AUGUST 2017

- Performed cross platform testing, reported bugs, suggested user flow improvements and documented records of all testing activities.
