EMPLOYMENT HISTORY

Full Stack Developer, Iwconnect, Bitola

MARCH 2022 — SEPTEMBER 2023

As a Full Stack Developer at IWConnect, I design, develop, and maintain client-facing websites and applications that meet specific needs. I leverage my extensive knowledge of React to build high performance websites, promote better component lifecycle practices, and create seamless user interfaces that result in improved user experiences. In addition, I have experience with Laravel, where I develop efficient and scalable back-end systems. Collaboration is key in delivering high-quality projects, and I work closely with other teams and senior management to ensure that client websites are delivered on time and meet the highest standards. I actively participate in code reviews, ensuring that all code adheres to best practices and is thoroughly documented.

Full Stack Developer, Sales.Rocks, Skopje

SEPTEMBER 2023 — MARCH 2024

During my tenure at Sales.Rocks, I had the opportunity to work on an established product focused on sending large volumes of emails and LinkedIn messages concurrently. My role as a Fullstack Developer involved enhancing the existing platform, where I leveraged Laravel for backend development and Vue.js for frontend implementation. Additionally, I contributed to the scalability of the system by implementing AWS Lambda functions using PHP. Collaborating closely with the product team, I actively participated in feature optimization efforts to ensure an improved user experience. This experience allowed me to deepen my expertise in both backend and frontend technologies while contributing to the evolution of a high-impact product.
