o **Creative**

o **Attention to details**

o **Motivated**

o **Communication skills**

o **Adaptability**

o **Team player**

o **Fast learner**

o **Problem solver**

Working experience

- **Full Stack Intern in Evrotip (3 months)**
- **Full Stack Developer in Evrotip (2 months)**
- **Manual QA Engineer in IW Connect (14.09.2022 - 30.09.2023)**
  With one year of experience I've gained a deep understanding of the software testing process and its pivotal role in ensuring the quality and reliability of software applications. My expertise lies in meticulously designing and executing test cases, systematically identifying and documenting defects, and collaborating with development teams to address and resolve issues. I've honed my skills in various testing types, including smoke, regression, and end-to-end testing, contributing to the creation of robust and user-friendly software. Through my work, I've not only validated the functionality of applications but I also played a crucial part in enhancing user experience and maintaining the integrity of software products. Overall, my experience as a manual QA Consultant reflects my commitment to ensuring software quality and my proficiency in the dynamic and critical field of software testing.

Key Skills

- **Test Strategy Development**: Proven expertise in crafting effective test strategies tailored to project requirements, ensuring comprehensive test coverage and alignment with business objectives.
- **Quality Process Improvement:** Demonstrated ability to analyze existing QA processes, identify areas for improvement, and implement strategies that enhance overall software quality while streamlining testing workflows.
- **Client Collaboration:** Skilled in engaging with clients to understand their unique business needs, translating requirements into robust testing plans, and providing insightful recommendations for quality enhancement.
