JOB APPLIED FOR

Senior PHP Developer

WORK EXPERIENCE

01/04/2010–Present

Founder
Yusuf Kuş
www.toplumonolog.com

I first developed this project in 2010 with Pure PHP. In 2014, I redeveloped everything with Codeigniter 2. Its a Turkish Social Media. Every user can write on common timeline. Noone has to follow anyone to see the posts. If you would like to follow spesific users for their posts, you can. And you can change your timeline settings to see posts from either users you follow or everyone. You can like, share, comment the posts. The core framework has been migrated from Codeigniter to Laravel + VueJS in between 2018-2019.

Technologies being used:
- Redis for queueing
- OneSignal for push notification
- NodeJS + Socket.io for instant notifications

Business or sector Social Media

02/2020–Present

Data Science Developer
DATA MIXER doo, Belgrade (Serbia)

- I was offered for this position by my managers in order to improve myself. Since this offer was from inside, I wanted to take action.

- I studied Machine Learning Models, practiced several models to solve real-life problems.

- I prepared an API (FastAPI - Python) for Python Team to send us the data they collected and to return them back the results we analyzed. (Sentiment Analysis, Image Analysis)

- I was also in charge of the deployment process of the API and setting up the server.

- For Image Analysis results, I had to use Celery and RabbitMQ for queueing the jobs

- In the beginning of June, we were asked to take over Python Team's tasks to finish what they left.

02/2019–02/2020

Web Team Lead
DATA MIXER doo, Belgrade (Serbia)

- I worked mostly as a mentor for the web team.

- I helped web team to learn how to use/integrate queue, caching systems. We implemented Redis to our platform for queue and caching systems.

- I helped web team to learn how to integrate social media logins (fb, google, twitter etc) via Laravel module called, Laravel Socialite

- I also took action to integrate Gitlab CI/CD to our servers (Automated deploys on each commit)

- After a request for a new design to the platform, I encouraged our Front-End to learn Tailwind CSS

and implement it to the new design

- I helped Backend Developer to create a new api module using design patterns (Factory Method, Strategy Method etc.) to communicate with Python team to get analyzed/collected data.

07/2018–02/2019	**Senior PHP Developer**

DATA MIXER doo, Belgrade (Serbia)

- I was responsible for building a web application from scratch for showing analysis, charts and reports on collected/analyzed data. (Laravel 5.6 + VueJS)

03/2018–07/2018	**Mid-Senior PHP Developer**

StuntCoders, Belgrade (Serbia)

- Developing/Implementing Magento 1-2 Modules

- Developing Wordpress plugins

- Fetch data from Microsoft Dynamics CRM API

- Create posts on a Facebook Page (with Facebook SDK) when a page/post created on WP

- Add additional scripts/css tags to header/footer

04/2017–08/2017	**Senior PHP Developer**

Istanbay, İstanbul (Turkey)
https://istanbay.com/

This was a remote work. We had customers from USA.

- elevarco.com (funding site for startup companies) (Written with Laravel 5.4 from scratch) (San Francisco, CA)

- rotaradar.com (Flight Tickets) (Laravel 5.4 + NodeJS + Socket.io + Redis)

04/2016–04/2017	**Senior PHP Developer**

Crealive, İstanbul (Turkey)
www.crealive.net

- ozelokulburada.com (Private schools/courses in Turkey) (Laravel 5.2)
